

Tame the beast – take control of your onboarding process with SI-mon: Trading Partner Enablement from System Integration Architects! With SI-mon: TPE, all you need to identify is your own company's business requirements – we'll handle the technical complexities of onboarding for you.

SI-mon: TPE eliminates inefficiencies by:

- ⇒ **DECREASING** the time required to implement Trading Partners
- ⇒ **DECREASING** the complexity of trading partner configuration in IBM® Sterling B2B Integrator
- ⇒ **INCREASING** the productivity of your implementation support team
- ⇒ **INCREASING** visibility into Trading Partner organizational structure, communication protocols, and all associated business transactions

SI-mon: TPE reduces onboarding costs by:

- ⇒ Allowing effortless creation and deployment of IBM® Sterling B2B Integrator artifacts and Business Process Frameworks.
- ⇒ Supporting multiple communication protocols and message standards.
- ⇒ Integrating seamlessly with IBM® Sterling B2B Integrator user controls.

With preconfigured workflows and smooth single-entry data, System Integration Architect's SI-mon: Trading Partner Enablement eliminates the costly uncertainties and technological obstacles in the IBM® Sterling B2B Integrator onboarding process. Effortlessly connect to multiple SI instances and create artifacts, setup organization structures and document routing channels - all without the need for expensive SI resources. Leverage the power of SIA Framework and SI-mon:TV. Test, fine-tune and customize deployments on any SI platform with full support for SI protocols and document formats. Reduce onboarding costs and increase your productivity today with SI-mon: Trading Partner Enablement from SIA.
